

Side Mount Sand Filter GFS3

Side Mounted Sand filter

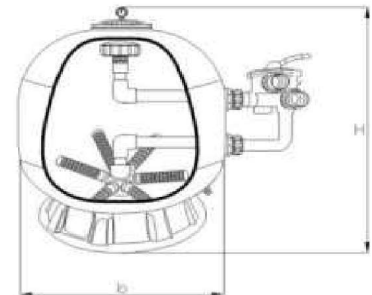

GFS3

GFS3 sand filter made from fiberglass and resin of high quality has good chemical resistance and the performance of anti-UV. It's surface is not easy to cracked and be broken by the impact because sand filter itself has a certain degree of flexibility. The water distribution designed uniquely can stabilize current uniformly and to improve drainage system. It easy to install, repair and convenient for maintenance. After filtration, turbidity of water is less than 2 degrees. It brings cleanliness and sanitation for your swimming pool and it is preferred filtration equipment for swimming pool, spa pool, waterscape and water park.

Feature:

- Filter body is made of glass fiber and it's surface is with ultraviolet-proof treatment
- Ergonomic six-way valve in seating design
- It equipped with stainless steel gauge
- Built-in filter bottom pipe, easy to maintenance
- The equipment of sand valves at the bottom row provide convenience for removal or replacement of sand in filter

Model	Size(mm)	inlet/outlet(inch)	flow rate(m <sup>3</sup> /h)	filter area(m <sup>2</sup> )	Sand weight(kg)	height(H)	Package Size(without valve)	Weight (kg)(without valve)
